Information Systems graduate from BINUS University specializing in Business Intelligence. Combines technical expertise gained as a Data Analyst intern at Bank BRI with strong leadership and operational experience as a Branch Marketing Supervisor at SMS Finance. A highly adaptable professional with a proven ability to bridge data-driven insights with strategic business execution in fast-paced environments.

WORK EXPERIENCE

PT. BANK RAKYAT INDONESIA (Persero) Tbk., **Central Jakarta, Jakarta**
Data Analyst *Feb 2023 – Feb 2024*

- Build and optimize 100,000+ data using Python Apache Spark to collect, clean, and transform customer transaction data into analysis-ready formats. Filtered data based on specific criteria to generate relevant insights for business decision-making.
- Prototype an interactive dashboard using Figma to visualize customer transaction data intuitively. The dashboard design made it easier to understand trends and patterns in the data.
- Developed an interactive dashboard using Google Looker Studio to provide real-time information on credit data. This dashboard allows stakeholders to monitor key performance indicators (KPIs) continuously and become monthly reports.
- Build an EWS (Early Warning System) using machine learning techniques to conduct a more objective credit assessment. The developed EWS model is able to predict credit risk with high accuracy, thus supporting better decision making in the credit approval process.
- Create a DFD (Data Flow Diagram) to document the entire data analysis process. This diagram serves as a comprehensive guide, helping the team understand the origins of the data, the transformation steps, and the final outcome of the analysis.

PT. SINAR MITRA SEPADAN FINANCE **Indonesia**
Branch Marketing Supervisor *Aug 2025 – Jan 2026*

- Collaborated with branch teams to develop and implement effective marketing strategies aimed at increasing financing volume and achieving company targets.
- Monitored and evaluated the effectiveness of marketing campaigns, preparing performance reports in Excel for management to support data-driven decision-making.
- Built and maintained professional relationships with dealers and agent business partners to expand the distribution network and strengthen brand presence.
- Analysed market trends and competitor activities to identify new market opportunities and optimize customer acquisition strategies.

PROJECT

- **UTBK Major Recommendation System** (GitHub)
  Engineered a data-driven web application using Python and Streamlit to assist students in identifying university majors. Applied the K-Nearest Neighbors (KNN) algorithm to analyse data records by score subtests, delivering objective and personalized recommendations based on score range.

- **Furniture Classification System** (GitHub)
  Built an Machine Learning pipeline using Python and Streamlit to classification furniture images based on item dimensions, placement, and sizes. Using Convolutional Neural Network (CNN) model to classify furniture images and combined with Visual Geometry Group (VGG16) to achieve higher accuracy model.

- **Online Sales Performance & Strategy Analysis** (GitHub)
  Conducted a comprehensive end-to-end data analysis on online sales transactions using Python (Pandas/NumPy) to identify revenue disparities across regions and product categories. Developed an interactive Tableau dashboard to visualize key performance indicators.

- **BCG X Customer Churn Prediction & Strategy** (GitHub)
  Developed a predictive machine learning model to identify customer churn risk for SME energy clients based on usage patterns and price sensitivity. Performed exploratory data analysis, engineered key pricing features, and evaluated Random Forest models to formulate data-driven discount strategies for customer retention.

- **Foreign Language Learning Application** (Figma)
  The platform integrates a comprehensive bilingual dictionary for quick vocabulary reference and features gamified quiz modules to test users' language proficiency.

- **Environmental Sustainability & Tree Planting App** (Figma)
  Built an engaging and user-friendly platform featuring interactive modules for green campaigns, community event registration, and educational environmental articles.

EDUCATION

BINUS UNIVERSITY — **Alam Sutera, Tangerang**
Bachelor of Computer Science in Information System streaming in Business Intelligence, (GPA: 3.27/4.0)
Sep 2020 – Oct 2024

TARAKANITA High School — **Gading Serpong, Tangerang**
Majoring in Social Studies
2017 – 2020

CERTIFICATION

- **Fundamentals of Digital Marketing by Google** (Google)
  Earned an official accreditation from Google covering core online marketing strategies, including SEO, SEM, social media marketing, email campaigns, and web analytics.

- **Hacktiv8 Full-Time Data Science & AI Machine Learning** (Hacktiv8)
  Completed an intensive, full-time program mastering end-to-end Data Science and AI Machine Learning, with hands-on experience in exploratory data analysis, predictive modeling, and model deployment.

- **Python (Basic) Certificate by Hackerrank** (HackerRank)
  Validated foundational proficiency in Python programming through HackerRank's technical assessment, covering core concepts like data structures, control flow, functions, and basic algorithms.

- **SQL (Basic) Certificate by Hackerrank** (HackerRank)
  Validated foundational proficiency in SQL through HackerRank's technical assessment, covering data filtering, aggregate functions, sorting, and relational table joins.

- **Forage BCG – Data Science Job Simulation** (Forage)
  Completed a hands-on data science job simulation with BCG, conducting exploratory data analysis, feature engineering, and predictive modeling to solve customer churn for a commercial client.
